

Total Meter Services, Inc.

FOR IMMEDIATE RELEASE

TMS automates Amtrak at Ivy City, DC.

Toronto, August 12, 2008 – TMS just finished working with Savage Associates, Inc., in conjunction with Larson and Company and TPC in installing refueling automation systems for Amtrak at their Ivy City facility in Washington, DC. The Ivy City location is in close proximity to Union Station, home to the Headquarters for Amtrak and is a major refueling point for Amtrak's high speed Acela Express, Northeast Regional, and Silver Star lines. The refueling automation system is used to track the refueling of the locomotives and diesel inventory levels.

Savage Associates, Inc of Berkeley Heights, NJ has provided professional services for the design, supply, and/or installation of over 1200 petroleum, industrial, and military storage and loading arm transfer and distribution systems since 1948.
