

Total Meter Services, Inc.

FOR IMMEDIATE RELEASE

Completes installation of new loading racks and Terminal Management Software for Foster Fuels, Inc.

Toronto, June 21, 2007 – “Biodiesel is a non-toxic, biodegradable diesel replacement fuel that is manufactured from domestically-produced oils such as soybean oil...” (Foster Fuels 2007) As “Green” energy grows in popularity so is the need to house the resource and ensure that every precious gallon is accounted for accurately.

Foster Fuels, Inc. of Brookneal, VA has contracted with Total Meter Services to construct and automate its new biodiesel bulk plant. TMS was asked to fabricate and install the 9 position top loading and 5 position bottom loading racks. The skids were fabricated in Total Meters Service’s Toronto facility and shipped to Virginia for installation. To compliment the new bulk plant is the installation of the TMS6000 Terminal Management Software. The TMS6000 is a custody transfer software application that will allow Foster Fuels, Inc. to monitor, track and report the loading of all biodiesel in their new facility as well as monitor fuel volumes in real-time.

Total Meter Services, Inc partnered with Liquid Controls, an IDEX company and its distributors to offer Foster Fuels state of the art technology to support their state of the art fuel alternative. It is imperative that bulk plant technology keep up with the technology of alternative fuels so Foster Fuels, Inc. chose the leaders in bulk plant hardware and software technology to complete their latest project.

Total Meter Services, Inc (TMS) was founded in Toronto, Canada in 1983 to meet the needs of clients whose businesses depend on quality flow measurement and control technologies. TMS provides services to include design, fabrication and installation of high pressure pipe assembly, design and installation of electronic automation and control systems and a complete line of meter proving and repair services.
