

Total Meter Services, Inc.

FOR IMMEDIATE RELEASE

## **TMS completes Toptech MultiLoad product interface**

Toronto, June 12, 2007 – Toptech Systems, Inc., part of the Liquid Controls Group, cordially opened its doors to the development team of Total Meter Services, Inc. (TMS). The meeting was facilitated by the Liquid Controls Group, a unit of IDEX Corporation (NYSE: IEX). The purpose of the meeting was to enable the creation of an interface between the Toptech MultiLoad II Single Meter Preset (SMP) and the TMS6000 Terminal Management Software package.

The TMS team was able to complete the product interface to the MultiLoad II Single Meter Preset (SMP). The development work by the TMS team now allows communication between the SMP preset and the TMS6000 software suite.

Total Meter Services, Inc (TMS) was founded in Toronto, Canada in 1983 to meet the needs of clients whose businesses depend on quality flow measurement and control technologies. TMS provides services to include design, fabrication and installation of high pressure pipe assembly, design and installation of electronic automation and control systems and a complete line of meter proving and repair services.
